

# Quick Start Guide

The Social Science Standards Instructional Resources website offers a wide range of resources designed to introduce key revisions to the standards and support vital content knowledge and evidence-based pedagogy. Whether you are taking your initial steps to familiarize yourself with the new aspects of the standards or you are seeking to use these resources to support others' professional learning, this Quick Start Guide serves as your entry point. It includes an overview of the types of resources available on the 2024 Oregon Social Science Standards website and suggestions for who might find them helpful.

## Learning from Community Engagement

Research-based practices and extensive feedback from Oregon community members, educators and students shaped these 2024 Oregon Social Science Standards. The Oregon Department of Education used a variety of outreach methods to understand the needs of everyone affected by and invested in the new social science standards. Key findings include

- ⦿ **Navigating the Standards:** Educators initially expressed concerns regarding the standards, specifically about the length of the document and the amount of specific content included.
- ⦿ **Professional Learning for Social Science Content:** Teachers frequently highlighted concerns about the content knowledge necessary for teachers when transitioning to the new standards, particularly at the elementary level. Elementary educators also sought guidance and training on integrating social science with other content areas.
- ⦿ **Professional Learning for Social Science Pedagogy:** There was a specific focus on professional learning needed by educators to effectively represent and support diverse student populations within their Oregon context, as well as navigate sensitive subjects thoughtfully and effectively.
- ⦿ **Instructional Resources:** Educators requested resources that are not only high-quality and aligned with the new standards but also affordable and user-friendly.
- ⦿ **Family and Community Engagement:** Educators anticipated that some families and community members would want more information about terms and topics introduced in the new standards and asked for guidance and materials to communicate that information with those groups.

In response to this feedback, the Oregon Department of Education compiled and developed a number of resources to help educators plan and deliver standards-aligned social science instruction that is responsive to their contexts. In this Quick Start Guide, you will find an overview of the types of resources available on the website and suggestions for who might find them helpful.
